

Evergreen Trees

majestic
t r e e s

As the name suggests, evergreen trees are in leaf year-round. New leaves push out the old as the tree grows, so unless the tree is under stress, the foliage is always present. Some trees are classified as 'semi-evergreen' meaning that if the tree gets too cold or too dry, they will drop most or all of their leaves in order to conserve energy and protect the overall tree from death. Evergreen trees do not usually have showy flowers or vibrant autumnal coloration but provide an excellent monochromatic background for deciduous trees and smaller plantings.

Taxus baccata (English Yew) is one of Britain's most traditional and long-living trees. Slow growing, but very malleable with pruning and producing a wonderful berry in winter.

For a light and airy evergreen option, *Acacia dealbata* is an ideal choice.

With its arching branches, *Cedrus atlantica* is dramatic in all seasons, but especially splendid in winter.

Ilex koehneana 'Chestnut Leaf' is an unusual holly with a softer, larger richly-toned leaf. A sophisticated choice for ornamental screening.

Thank you for your interest in Majestic Trees. We are pleased to provide you with our current availability of trees. The trees detailed on the list are those we currently have in stock at our nursery. Numbers can and do change daily, so please call to confirm availability of particular stock. The heights and girths reflect actual heights and girths. Please be aware that there are some items that may not be available for planting immediately, if they are rooting out. These trees are indicated with an estimated date under the 'Available from' column. You may purchase them now as many customers do to get the pick of the litter, but we will not deliver until they have rooted out. We do not provide pricing on line but are more than happy to provide a price list upon request or quote for specific stock. We do not have a minimum order value. In order to more efficiently provide you a quote, please have the following information to hand when you contact us:

- a) batch numbers of the trees in which you are interested
- b) if you would like the tree to be delivered, please provide the post code of the delivery address – delivery charges are quoted per order, not per tree
- c) if you would like us to plant the tree(s), please provide pictures and detailed information about the access, including gate and doorway widths, wall heights, sharp corners, number of steps, and overhead obstacles such as guttering, arches, etc. A general overview of the planting area is also helpful.
- d) if you require advice on tree selection, please email photographs of the area to be planted as well as a general overview of the site together with information on soil type if known, what you hope to achieve and any budgetary restrictions. We will then recommend appropriate trees.

Detailed information and advice is available on other areas of the website.

Ilex 'Nellie R. Stevens' is a very ornamental holly tree which berries freely for long periods.
