

Small Garden Trees

Few trees are truly 'small.' In the industry a small tree is classified as under 30' (10m) tall. Keep in mind, however, that even most medium-sized trees can be managed by pruning to acceptable heights. There are a few trees, particularly shrubs varieties that have been trained into tree forms, that never get any taller than 15-20' (5-7m). This tree selection list includes all our small trees as well as medium sized trees that can be managed by pruning. We have not included any trees whose vigorous growth habit would make them difficult to maintain at acceptable heights.

Malus 'Wintergold' makes an equally good show of its spring blossom and autumn fruits.

Sorbus 'Vilmorinii' gives multi-season interest, with a delicate blossom in spring, soft airy summer foliage, and russet autumn colour with berries .

Japanese Acers such as *Acer palmatum 'Bloodgood'* are an excellent choice for a small garden.

Thank you for your interest in Majestic Trees. We are pleased to provide you with our current availability of trees. The trees detailed on the list are those we currently have in stock at our nursery. Numbers can and do change daily, so please call to confirm availability of particular stock. The heights and girths reflect actual heights and girths. Please be aware that there are some items that may not be available for planting immediately, if they are rooting out. These trees are indicated with an estimated date under the 'Available from' column. You may purchase them now as many customers do to get the pick of the litter, but we will not deliver until they have rooted out. We do not provide pricing on line but are more than happy to provide a price list upon request or quote for specific stock. We do not have a minimum order value. In order to more efficiently provide you a quote, please have the following information to hand when you contact us:

- a) batch numbers of the trees in which you are interested
- b) if you would like the tree to be delivered, please provide the post code of the delivery address – delivery charges are quoted per order, not per tree
- c) if you would like us to plant the tree(s), please provide pictures and detailed information about the access, including gate and doorway widths, wall heights, sharp corners, number of steps, and overhead obstacles such as guttering, arches, etc. A general overview of the planting area is also helpful.
- d) if you require advice on tree selection, please email photographs of the area to be planted as well as a general overview of the site together with information on soil type if known, what you hope to achieve and any budgetary restrictions. We will then recommend appropriate trees.

Detailed information and advice is available on other areas of the website.
