

# Mediterranean Trees

majestic  
t r e e s

We offer a limited selection of trees that are typically found in Mediterranean climates, such as Cordyline, Acacia, Palm, Bamboo, Olive etc. We only grow those that will survive the less than temperate weather of southern Britain. Some can grow anywhere in the UK with the right ground conditions provided there is protection during extreme weather. Most of these trees will grow in any free-draining soil but cannot tolerate having their roots wet and cold for any length of time, and particularly suffer if there is a hard frost that freezes more than the surface soil. Ideally, these varieties should be planted in containers, raised beds, atriums, courtyards or sheltered areas where there is protection from cold winds. Our horticultural advisors can give you recommendations for your particular area and situation.

Thank you for your interest in Majestic Trees. We are pleased to provide you with our current availability of trees. The trees detailed on the list are those we currently have in stock at our nursery. Numbers can and do change daily, so please call to confirm availability of particular stock. The heights and girths reflect actual heights and girths. Please be aware that there are some items that may not be available for planting immediately, if they are rooting out. These trees are indicated with an estimated date under the 'Available from' column. You may purchase them now as many customers do to get the pick of the litter, but we will not deliver until they have rooted out. We do not provide pricing on line but are more than happy to provide a price list upon request or quote for specific stock. We do not have a minimum order value. In order to more efficiently provide you a quote, please have the following information to hand when you contact us:

- a)** batch numbers of the trees in which you are interested
- b)** if you would like the tree to be delivered, please provide the post code of the delivery address – delivery charges are quoted per order, not per tree
- c)** if you would like us to plant the tree(s), please provide pictures and detailed information about the access, including gate and doorway widths, wall heights, sharp corners, number of steps, and overhead obstacles such as guttering, arches, etc. A general overview of the planting area is also helpful.
- d)** if you require advice on tree selection, please email photographs of the area to be planted as well as a general overview of the site together with information on soil type if known, what you hope to achieve and any budgetary restrictions. We will then recommend appropriate trees.

Detailed information and advice is available on other areas of the website.

Olive trees (*Olea europaea*) take on a wonderful wisened habit with age. Younger versions provide a less formal alternative to topiary.
